

# Idle drive for FlexoArt UV-Flexo unit

## For printing with water and solvent based inks

- **Water and solvent.** The idle drive unit enables usage of water and solvent based inks with the R160/200 unit.
- **Easy integration.** By only exchanging a screw and connecting the engine the idle drive is ready to be used.
- **Electric engine.** The 220V 50Hz AC electric engine turns the anilox in 33 rpm ensuring no dried in ink.
- **Unifit.** The idle drive can be placed in both left and right hand position on both FlexoArt R160 and R200 UV/Flexo unit.
- **Automatic.** The idle drive starts automatically immediately after the press stops.
- **Complete kit.** The idle drive is delivered as a complete kit with only the electric engine to be connected.
