

GripTite

BLADE HOLDER SYSTEM

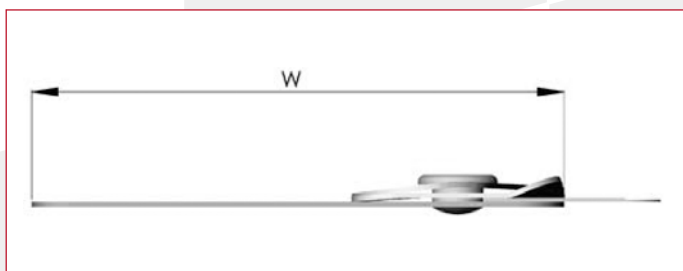

- **Even pressure.** With tight riveting the GripTite® Holder offers the smoothest and precisest doctoring available.
- **High speed change.** The balanced clamping list makes the exchange of doctor blades fast and precise. Time after time.
- **Stainless steel.** All parts made of Swedish high quality stainless steel making the cleaning easy during its long life cycle.
- **Multiple profiles.** FlexoArt GripTite® System is available in different profiles enabling replacement of all existing blades.
- **Patented Riveting.** Unique patented riveting makes the holder truly ink tight ensuring problem-free printing.
- **Multiple widths.** Depending on application FlexoArt GripTite® System is available in several widths.
- **Unifit.** The GripTite System fits all gravure presses and nearly all flexo systems on the market.
- **Quality.** FlexoArt provides customers secure and high-speed deliveries due to optimized production methods.

GripTite – PERFECT DOCTORING – COST EFFECTIVE – HIGH SPEED BLADE CHANGE

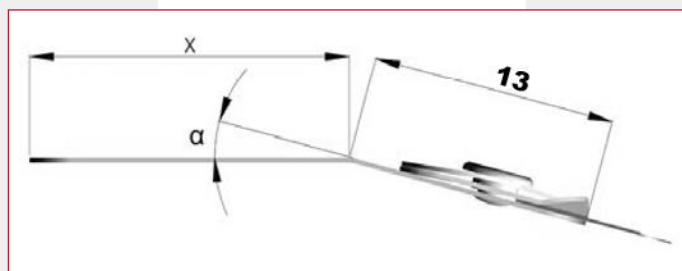

TECHNICAL INFORMATION

TYPE STRAIGHT

For normal printing conditions. The straight model comes in different widths.

Lengths	100 – 3000 mm
Widths (w)	25, 30, 35, 40, 45, 50, 55 and 60 mm
Doctor blade thickness	<0.25 mm std. 0,30-0,50 mm spec.

TYPE ANGLED

For special conditions. The Angled model is available in different widths and angles for tailor-made solutions.

Lengths	100 – 3000 mm
Widths (x)	12, 17, 22, 27, 32, 37, 42 and 47 mm
Doctor blade thickness	<0.25 mm std. 0,30-0,50 mm spec.
Angles (α)	5°- 20°
Custom angles possible	

DOCTOR BLADES

- The GripTite holder uses low cost doctor blades as wearing part.
- High quality Swedish steel
 - Stainless, carbon, long life etc.
- Tailor-made edges
 - Radius, lamella, step etc.
- Tailor-made lengths
 - 100 metre/roll or pre-cut lengths.
