

SERVICE TABLE

— CHAMBER SYSTEMS —

STRONG | PRACTICAL | SIMPLE

The FlexoArt Service Table and options is designed to offer chamber system customers a complete work space for regular service and consumables change for our chambers.

Based on a strong aluminum sub-frame, a solid stainless steel top surface and a square hole pegboard, the basic unit offers a very sturdy and versatile work space for many service jobs.

Paired with our customised optional alternatives, chamber system customers can assemble a complete work station for our chamber systems.

All parts are sent in a flat-pack enabling quick and simple assembly.

BENEFITS INCLUDE:

- Dedicated work space
- High quality components
- Simplifies service and maintenance

Selectable options

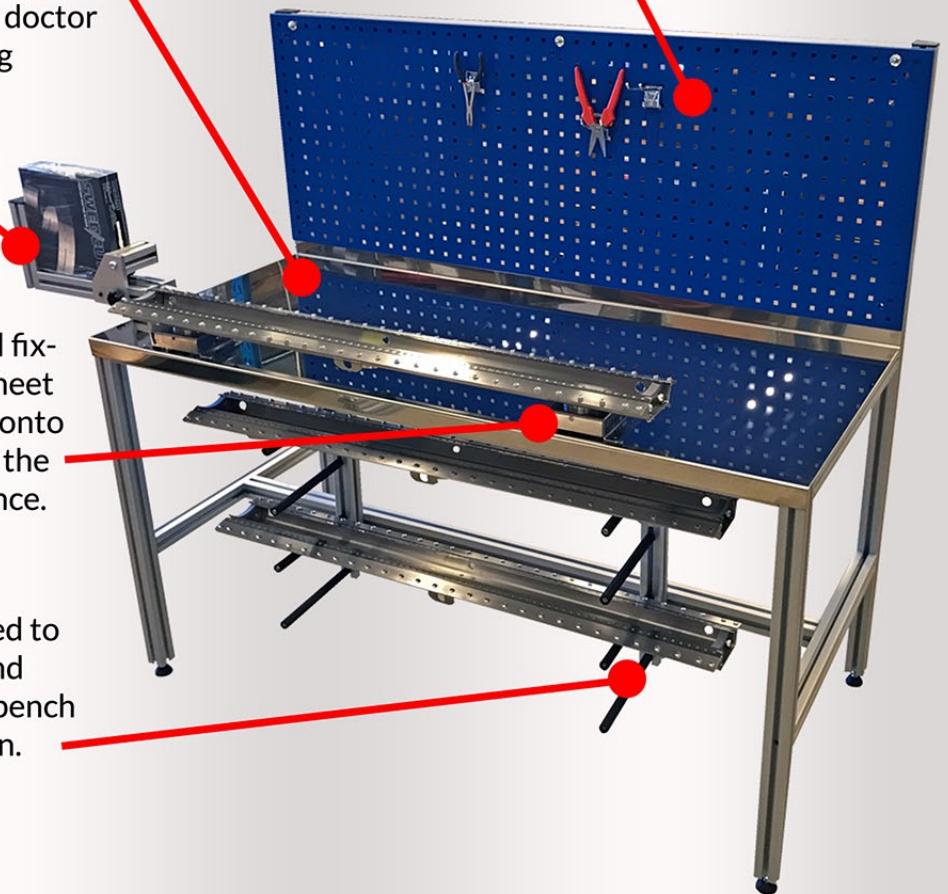

Table top length: You can select a table top (and tool hanger) 1500 or 2000mm long

Doctor blade box holder: A box holder and doctor blade lead designed to house of doctor blade boxes for easy roll-off and cutting

Chamber fixture: These stainless steel fixtures (made of strong stainless steel sheet metal) are designed for screw fixation onto the workbench, offering a solid grip of the chamber during service and maintenance.

Chamber storage rack: Sturdy designed to hold chambers prior or after service and maintenance. Placing them under the bench top is a safe and out of the way position.

Tool hangers: A set of 25 hooks and holders (including 2 larger holders for screwdrivers and/or spanners) offering almost endless setup possibilities.

The Service Table design is intended to offer great strength and durability aswell as simple assembly and use. The Service Table solution therefore offers full assembly using standard tools (like Allen Key, wrench and drill etc), and great adaptability, like free positioning of options on the tabletop and individually adjustable feet height etc.
